I don't think mathematicians are the people to ask. "New Math" wasn't new math at all - it was standard abstract concepts known to all mathematicians. The controversy was whether these concepts are useful or helpful to non-mathematicians, and mathematicians may be the least qualified people to answer that.

Therefore, the author's lament seems to draw us to some ideal world that is very remote from today's world but worth thinking about and recognizing as important. In the real world, much of mathematics, at any level, and in any field, can seem overly hard, unmotivated, dry, and/or unappealing, even to mathematicians.

But mathematics should have no pretense of being directly about the physical world. That is the realm of science and engineering, and they do a good enough job of that. Mathematics is about the abstraction, and that's not the problem. These abstract ideas are interesting and would provide enough motivation, that's not the issue.
