Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

ABSTRACT. This paper aims to study how the Balanced Scorecard is related to the process of innovation in organizations. As a contribution, the work expands the usefulness of the model, by specifying external stimuli, dynamic tension, innovation strategies and perceived innovation success.

The role of the balanced scorecard in innovation management

As an illustration, a mixed methods evaluation of mental health services in a multiethnic community combined a quantitative cross-sectional survey (a structured questionnaire) and an ethnographic study (documents, interviews, and observations), which allowed for a better understanding of survey results and the development of a new program to facilitate access to services ().

Combining the Power of Stories and the Power of Numbers

The paper is based on ideas developed from reading editorials and articles on leadership in several journals. The study is also based on discoveries from a survey administered to some Africans to gather their perception about leadership in sub-African countries.
