Primary Resources - free worksheets, lesson plans and teaching ideas for primary and elementary teachers.

Primary Resources: Science: Life Processes and Living Things

The NBER does not define a recession in terms of two consecutive quarters of decline in real GDP. Rather, a recession is a significant decline in economic activity spread across the economy, lasting more than a few months, normally visible in real GDP, real income, employment, industrial production, and wholesale-retail sales.

US Business Cycle Expansions and Contractions

Milankovitch cycles describe the collective effects of changes in the Earth's movements on its climate over thousands of years. The term is named for Serbian geophysicist and astronomer Milutin Milanković. In the 1920s, he hypothesized that variations in eccentricity, axial tilt, and precession of the Earth's orbit resulted in cyclical variation in the solar radiation reaching the Earth, and ...

Milankovitch cycles - Wikipedia

Objectives. To identify and explain the parts of a flower and their role in the life cycle of flowering plants, including pollination, seed dispersal and germination.

3 Science Directions Read each question and choose the best answer. Then fill in the circle on your answer document for the answer you have chosen.

GRADE 3 SCIENCE - Virginia Department of Education Home

Dewey's cycles work. Dewey first became interested in cycles while Chief Economic Analyst of the Department of Commerce in 1930 or 1931 because President Hoover wanted to know the cause of the Great Depression. Dewey reported that each economist to whom he spoke gave him a different answer and he lost faith in the current economic methods.

Edward R. Dewey - Wikipedia

This document replaces The Ontario Curriculum, Grades 1–8: Science and Technology, 1998. Beginning in September 2008, all science and technology programs for Grades 1 to 8 will be based on the expectations outlined in this document.

Kimberlite Magmatism - ABC

Kimberlite magmatism has occurred in cratonic regions on every continent. The global age distribution suggests that this form of mantle melting has been more prominent after 1.2 Ga, and notably between 250-50 Ma, than during early Earth history before 2 Ga (i.e., the Paleoproterozoic and Archean).

Geodynamics of kimberlites on a cooling Earth: Clues to

Graphene quantum dot (GQDs) encapsulated melamine-formaldehyde (MF) polymer microspheres with a uniform particle size distribution and tunable high-quality white-light emission were prepared via polymer-mediated assembly and encapsulation. The luminescent properties were effectively regulated by the doping concentrations of GQDs in the MF polymer matrix.
