Software documentation is written text or illustration that accompanies computer software or is embedded in the source code. It either explains how it operates or how to use it, and may mean different things to people in different roles. Documentation is an important part of software engineering. Types of documentation include:

In less than 45 minutes learn how to develop a fully functional java program that uses Salesforce REST API, queries and manipulate data inside Salesforce.com. This is a step-by-step guide with screenshots that will tell you how to download, install, configure and create everything that you need for this.

### **Step-By-Step Guide to Get Started with Salesforce REST API**

An interface description language or interface definition language (IDL), is a specification language used to describe a software component's application programming interface (API). IDLs describe an interface in a language-independent way, enabling communication between software components that do not share one language. For example, between those written in C++ and those written in Java.
