In the social sciences, coding is an analytical process in which data, in both quantitative form (such as questionnaires results) or qualitative form (such as interview transcripts) are categorized to facilitate analysis.. One purpose of coding is to transform the data into a form suitable for computer-aided analysis. This categorization of information is an important step, for example, in ...

Constructivist epistemology is a branch in philosophy of science maintaining that scientific knowledge is constructed by the scientific community, who seek to measure and construct models of the natural world. Natural science therefore consists of mental constructs that aim to explain sensory experience and measurements.. According to constructivists, the world is independent of human minds ...

1. Introduction. Social acceptance of energy and fuels is a research area of increasing size and importance, situated approximately at the intersection of two much larger bodies of literature: the diffusion of new technology and/or innovations [], and the social scientific study of energy and policy [].Using a definition provided by a recent conceptual review of the field, we can define ...

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.
