We show, via a massive (N = 689,003) experiment on Facebook, that emotional states can be transferred to others via emotional contagion, leading people to experience the same emotions without their awareness. We provide experimental evidence that emotional contagion occurs without direct interaction between people (exposure to a friend expressing an emotion is sufficient), and in the complete ...

Experimental evidence of massive-scale emotional contagion

The material is prepared as per ICAR approved syllabus for the benefit of UG students already enrolled in Indian Agricultural Universities.
