but his point is still correct, the linear algebra is wasted due to the way of explanation and still is. The way they teach school or university up till today and all the online courses was exactly about knowing, sizes, vectors, positive definite and determinant zero.

### An Intuitive Guide to Linear Algebra â€“ BetterExplained

Probability is the branch of mathematics that studies the possible outcomes of given events together with the outcomes' relative likelihoods and distributions. In common usage, the word "probability" is used to mean the chance that a particular event (or set of events) will occur expressed on a linear scale from 0 (impossibility) to 1 (certainty), also expressed as a percentage between 0 and 100%.

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...
