light railways. It was not until the 1970s that the term "light rail transit" came into use in the United States. There was no formal definition of LRT at that time, but it was generally understood to mean an urban rail transit form that was leaner and less costly than other rail modes. A formal definition was adopted in 1989 and placed in ...

A light railway is a railway built at lower costs and to lower standards than typical "heavy rail": it uses lighter-weight track, and is more steeply graded and tightly curved to reduce civil engineering costs. These lighter standards allow lower costs of operation, at the price of slower operating speeds and lower vehicle capacity.
