suffering malnutrition and other geriatric syndromes. Data has been published on malnutrition prevalence in institutionalized elderly diabetic patients but not in hospital patients 11 and little is known on the impact that malnutrition has on the progression of the disease for which the patient was admitted.

### **Malnutrition prevalence in hospitalized elderly diabetic**

However, hospital malnutrition in Asia is as prevalent as it was 35 years ago.<sup>9</sup> There is a need to identify a population-specific and simple nutrition screening that is validated for use in hospitalized elderly people

### **Malnutrition in Hospitalized Asian Seniors**

Let me say, for sure, malnutrition in elderly patients is associated with terrible outcomes in terms of length of stay, mortality, functional decline, and of course nursing home admission, Dr. Robert M. Palmer said at the annual meeting of the Society of Hospital Medicine.

### **Malnutrition Missed in Hospitalized Elderly | Family**

Over 100 years later, beginning from the 1970s, numerous authors have reported malnutrition rates in hospital patients to be approximately 35%, with 30 to 55% of patients entering acute hospitals being at risk of malnutrition [20–24].

### **Hospital Malnutrition: Prevalence, Identification and**

Furthermore, malnutrition, a recognized geriatric syndrome (Institute of Medicine [IOM], 2008), is of concern because it can often be unrecognizable and impacts morbidity, mortality, and quality of life (Chen, Schilling, & Lyder, 2001), and is a precursor for frailty in the older adult.

### **Nutrition in the Elderly | ConsultGeri**

advances to eliminate malnutrition in the hospital have been made, yet it still remains concern. Among older adults, malnutrition is associated with a multitude of geriatric syndromes, including cognitive deficit,
