Millions of Engineers and Scientists Trust MATLAB. MATLAB Â® combines a desktop environment tuned for iterative analysis and design processes with a programming language that expresses matrix and array mathematics directly.. Professionally Built. MATLAB toolboxes are professionally developed, rigorously tested, and fully documented.

MATLAB - MathWorks - MATLAB & Simulink

Millions of engineers and scientists worldwide use MATLAB Â® to analyze and design the systems and products transforming our world. The matrix-based MATLAB language is the worldâ€™s most natural way to express computational mathematics.

A 4th-generation programming language (4GL) or (procedural language) is any computer programming language that belongs to a class of languages envisioned as an advancement upon third-generation programming languages (3GL). Each of the programming language generations aims to provide a higher level of abstraction of the internal computer hardware details, making the language more programmer ...

Object-oriented programming (OOP) is a programming paradigm based on the concept of "objects", which may contain data, in the form of fields, often known as attributes; and code, in the form of procedures, often known as methods. A feature of objects is that an object's procedures can access and often modify the data fields of the object with which they are associated (objects have a notion of ...

Computer use is an integral part of the Civil Engineering curriculum. From required courses in computer programming and numerical analysis to subsequent use and development of Civil Engineering programs, students experience the use of computers as a planning, analysis, design, and managerial tools.
