

molecular biology of the pdf

Molecular biology / mɒˈlɪkjʊləˈbɪɒlədʒi / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

Molecular biology - Wikipedia

Molecular biology is the study of biology at a molecular level. The field overlaps with other areas of biology, particularly genetics and biochemistry. Molecular biology chiefly concerns itself with understanding the interactions between the various systems of a cell, including the interrelationship of DNA, RNA and protein synthesis and learning how these interactions are regulated.

Category: Molecular biology - Wikipedia

A proper balance between the repair of DNA double-strand breaks (DSBs) by homologous recombination and nonhomologous end joining is critical for maintaining genome integrity and preventing tumorigenesis.

The Centre for Cellular & Molecular Biology (CCMB) is a premier research organization in frontier areas of modern biology. The objectives of the Centre are to conduct high quality basic research and training in frontier areas of modern biology, and promote centralized national facilities for new and modern techniques in the inter-disciplinary areas of biology.

Department of Biology. Biology today is the study of all living organisms and their relationships and interactions with other living organisms. Different biologists study different elements of Biology: genetics, cell biology, physiology, ecology, population biology, limnology, toxicology, conservation, behaviour, parasitology, development, etc.
