**Institute of Biomechanics, Graz University of Technology**

1. Introduction A wide variety of materials combines viscous behaviours with transverse isotropy. Examples of these are soft tissues in humans, animals or plants (Zulliger et al., 2004, Gasser et al., 2006, Wang et al., 2014). The mechanical behaviour exhibited by these soft tissues is known to involve complex phenomena such as large deformation and nonlinear response.

**A continuum mechanics constitutive framework for**

The blood flow in human arterial system can be considered as a fluid dynamics problem. Simulation of blood flow in the arterial network system will provide a better understanding of the physiology of human body.
