The present work was carried out in order to determine the effects of calcium nitrate and humic acid applications either separately or in combination on the growth and fruit yield quality of pepper plants under salt stress condition.

Ameliorative effects of calcium nitrate and humic acid on

There is a strong need for the development of new antiviral therapies, and this study sheds light on a host-virus interaction that is significant for a number of medically important human viruses. The study also suggests that the RNA-binding zinc finger CCCH-type containing 11A (ZC3H11A) protein takes part in a mechanism that facilitates nuclear export of mRNA, particularly under cellular ...

Multiple nuclear-replicating viruses require the stress

1. Introduction. The tree of dates or the palm date (*Phoenix dactylifera* L., Family *Arecaceae*) has played an important role as a food security crop in the Middle East and North Africa region (MENA), providing valuable food for people for the last 5000 years. In appreciation of its fruits, the date tree is referred to as the sacred tree, the tree of life, and the bread of the desert.

Date fruit (*Phoenix dactylifera* L.): An underutilized food
