

### **physics electrostatics questions and pdf**

For conductors at electrostatic equilibrium, the electric fields are strongest at regions along the surface where the object is most curved. The curvature of the surface can range from flat regions to that of being a blunt point, as shown below.

### **Physics**

Questions target a student's ability to identify the supporting evidence for a particular conclusion, to draw conclusions that are consistent with two or more data presentations, to make predictions based upon a model, to predict the results of an additional trial, and to understand the design of an experiment.
