Photovoltaic (PV) technology has been used to power homes for many years, and with good reason. Sufficient sunlight falls on Australia to supply the nation's total energy needs many times over. By installing solar modules (or panels), the homeowner is able to capture some of this abundant energy. Read this article in conjunction with Renewable energy.

The electricity system is changing. Many of us have heard the terms "smart grid", "smart meter" and "smart appliance" but may not know what they mean or how they could affect us. Smart grid is often used to mean closer integration of the supply side and demand side of the electricity system, through better communications and controls.
