The front cover picture, provided by Yong Rok Lee et al., exhibits the advances in the halo-functionalization of diazo compounds. Recently, diazo compounds have become extensively used for the synthesis of organo halides. This review provides a comprehensive summary of such transformations on diazo compounds using diverse halogenating agents.

Speech synthesis is the artificial production of human speech. A computer system used for this purpose is called a speech computer or speech synthesizer, and can be implemented in software or hardware products. A text-to-speech (TTS) system converts normal language text into speech; other systems render symbolic linguistic representations like phonetic transcriptions into speech.
