Providing high-quality emergency care services to children requires an infrastructure designed to support care for pediatric patients. In Chapter 2 the committee discussed how many provider organizations, both emergency medical services (EMS) agencies and hospitals, lack recommended pediatric equipment and supplies for children. Addressing these basic deficiencies is an important first step.

Facial trauma, also called maxillofacial trauma, is any physical trauma to the face. Facial trauma can involve soft tissue injuries such as burns, lacerations and bruises, or fractures of the facial bones such as nasal fractures and fractures of the jaw, as well as trauma such as eye injuries. Symptoms are specific to the type of injury; for example, fractures may involve pain, swelling, loss of ...
